Great

Static Chef page ..

This hackathon has been an incredible journey! Each day brings new challenges and opportunities to learn.

Here are some exciting features I've added to my project:

Product List Page: Dynamic product listing with search, sorting, pagination and filtering functionality.

Dynamic Product Pages: Each product has its own page with add-to-cart functionality.

Cart Management: Users can add/remove products, update quantities, and view cart summary.

Dynamic Blog Page: Each Articles has it's own Dynamic page/ Comment section for user engagement.

Chef's Page: Details about our chef, including bio and more.
